PROJECTS

FOOD ORDERING Oct, 2021
https://github.com/1218Anubhavmishra/food_website.git
A food ordering website for a restaurant .
I was responsible for the backend using JS .
This website was developed as a prototype to be used by a restaurant to enable its customers to order food and deliver it to their houses from the restaurant.

TRAVEL AID Nov, 2022
https://github.com/1218Anubhavmishra/TravelMate.git
A travel app developed in Android Studio while competing in Novathon in 2022.
I was responsible for the backend through Java .
This Application was developed to provide A ride sharing system
A user can share his vehicle with others users and save their travel expense.
The cost is proportionally divided among all the user, including the driver..
This also has a side benefit of reducing traffic and pollution.

SPORTS ACADEMY PORTAL Jan'23 - June'23
https://github.com/1218Anubhavmishra/Sports_mastery.git
A sports academy web application developed during my Django project training to enable all administrative and management task to be conveniently caried out on the internet.
I was responsible for backend Python programming.

This Web Application was developed for a Sports Academy to provide them the capability to carry out all the management related task in an online mode
It provides quick transfer of information between various sub-departments.
It also enables large scale advertisement and promotion.

VOICE VAULT- 2026
https://www.voicevault.xyz
This Live Website Project is an Audio Note app that saves your note as audio and text on a cloud server.

PLACE- GREATER NOIDA , U.P. , INDIA
